## Name change for Alto

---

Tuesday, 29 May 2007

**JUNIOR explorer Alto Energy is moving to change its name to Grand Gulf Energy Ltd, reflecting the company's change of focus to conventional oil and gas plays in Oklahoma and Louisiana and the divestiture of its Appalachian Basin shale gas interests.**

Alto managing director and chief executive James Trimble said the change would bring the name of the listed entity into line with its US operating subsidiary.

The company announced on January 29 the change of name of its main USA operating subsidiary to Grand Gulf Energy, Inc.

The change is subject to shareholders' approval at a meeting on June 26.
